Personal Projects

Web Today News,
An API based news webapp using Reactjs ⤢
This application provides its end users with the latest updated news. It acts as a central platform for accessing trending news and headlines from different categories in one single place. End users can also surf through the feed based on their searched query.

Text Converter and translator,
an API based application using Reactjs ⤢
TextConverter is a text utility web app designed to help users with text-related operations. It also provides a text translation feature.

Product Landing Page,
created with reference to a figma design ⤢
This is a landing page for a medical facility made using Figma design as a reference with the help of React, HTML, CSS, and Javascript

Developer Portfolio,
a website created using reactjs and tailwind css ⤢
This is a portfolio website made for showcasing my work as a front-end developer.

Password Generator,
made using html,css and javascript ⤢
Password Generator is a web app created in order to help users with password suggestions. Here the password gets generated on the basis of criteria selected by users.

Certificates

AWS Certified Cloud Practitioner ⤢ *(Foundational)*

Techgig Code Gladiators ⤢ *(Finale)*

HackerRank JavaScript Assessment ⤢ *(Intermediate)*

Professional Experience

Associate Consultant, *Capgemini*
2020 – 2022
- Worked as an SAP SD and MM consultant for Atlas Copco as the client.
- Communicated with clients as and when required and helped them debug and solve their issues.
